### **How to help injured workers**

Please give the new address and telephone number to all injured workers you are working with in these service locations.

Share with workers that there will be brief closures during business hours to transfer and test telephone systems. Workers should consider this if needing to visit a service location office. Providers should also consider this when scheduling in-person meetings with workers at these service locations.

### **How will these changes affect a firm and/or individual provider?**

Firms and Vocational Providers associated with either of these services locations:

- These changes will not affect referrals in these service locations.
- You do not need to take any action to change the name of your service location or branch information for your firm or individual provider information with the Department.

The Department will automatically update your information to reflect these changes. Your service location for Bremerton will be identified in our system as Silverdale, and your service location for Port Angeles will be identified in our system as Sequim.

- These changes will affect how you will find performance measure information in the Claim and Account Center. You will need to search by the new service location city name. For example, if looking for performance measure details for service location Port Angeles, you will now need to look under Sequim.
