

Additional Program Requirements Table

This table will help you determine additional programs, plans, and other related requirements that might be needed beyond your accident prevention program (your total safety and health plan). If you are required to have additional written programs or procedures, they can be included in your accident prevention program or covered in supplemental documents.

To use this table:

1. Determine if any of the activities, hazards or situations listed in the first column apply to your workplace.
2. The second column lists what you may have to do or additional written programs you may be required to have.
3. Look-up the standard or rule that is in column three. This will allow you to determine if the actual situation at your workplace makes it necessary for you to do anything and will identify what you must do.

Note:

- There are record keeping requirements in chapter 296-27 WAC and elsewhere that you need to be aware of.
- Certain job-specific activities need written, site or activity-specific work plans (for example, the fall protection work plan and lead exposure in construction work).
- There are vertical standards that apply to specific industries, which may have additional program requirements. Be sure to check to find out if these standards apply to you.
