Creating Opportunities for People with Disabilities

About Skookum

Established in 1988, Skookum has grown to be one of the nations largest non-profit employers of people with disabilities. Skookum prides itself on creating a positive working environment which encourages personal growth and the learning of new skills. Skookum is an equal opportunity employer.

Partnership with our government customer is a cornerstone of our culture, second only to our mission of "Creating Opportunities for People with Disabilities". The government customer looks for contractors of high integrity with the proven ability to self-manage. Skookum's reputation in this area is second to none.

About the Program

Skookum is proud to offer a US Department of Labor and Washington State Apprenticeship Training Council (WSATC) approved Apprenticeship Program consisting of 572 RSI (classroom) hours and 8,000 on-the-job training (OJT) hours.

Working in partnership with Bates Technical College in Tacoma, Skookum has adopted an amazing resource for those who are interested and pass the minimum requirements. Apprentices in this program have the opportunity to make competitive wages, attend classroom instruction and accumulate OJT hours while employed at Skookum's Fleet Maintenance Division on Joint Lewis/McChord Military Base. Your training will focus on the service, repair and maintenance of military diesel medium/heavy vehicles and equipment.

Veterans may be able to use their Montgomery GI Bill once enrolled in the Apprenticeship Program.

About the Classes

Classes at Bates College are set in the evenings on Tuesdays and Thursdays from 4:30pm-8:30pm. Classes at Fort Lewis are from 4:00pm-8:00pm.

(Schedules are subject to change.)

Skookum employees may enroll at any time and begin on-the-job training (OJT).
