

Apprenticeship Fee Guidance 2009-11

The State Board for Community and Technical Colleges (SBCTC) issues policy on tuition and fee rates annually, and these can be accessed on the SBCTC's website under "Tuition and Fees" (www.sbctc.edu/college/f_tuition.aspx). For ungraded apprenticeship courses, the college shall waive 50 percent of operating fees deposited to fund 149 at \$41 per credit, or a clock hour option of \$2.70 per clock hour. Technical colleges operating on a clock hour basis may determine whether they will use the standard lecture/lab ratio or the mixed/variable rate at 16.5:1. There is no separate charge for building or S&A fee (waiver is 50 percent of current tuition rate). Colleges are afforded the option to use either the credit or clock hour basis in establishing rates for courses.

Contract Rates and Rent

By agreement reached between the presidents, the SBCTC, and the apprenticeship training community, minimum rates have been established for contracting training from the training trusts and paying "rent" when trust facilities are used for the training. It was agreed that those rates would be adjusted biennially, based on the system budget changes funded by the Legislature. (See *Apprenticeship Funding Guidelines, June 2007.*)

The contract rate for 2009-11 is \$2,573 and rent is \$428.
