

“Our apprenticeship program has enabled individuals in our community to receive training while working on the job in the dentists’ offices. The program has really helped to fill the jobs with trained assistants.”

Dr. Mary Roth, Cofounder
Dental Assistant Apprenticeship

WASHINGTON STATE

Registered Health Care Apprenticeships

Registered Apprenticeship Consultant Services

Apprenticeship is a structured system of hands-on training. Apprenticeship consultants will help you identify which type of apprenticeship model best suits your company and then provide one-on-one consulting and on-site assistance to get your program up and running.

We assist you in growing a pool of skilled staff by:

Connecting you with funding for training start up costs.

We will help you source funding options including multiple grant opportunities and partial wage payment of trainees as available.

Developing training plans that can be used in a variety of settings.

Experienced apprenticeship consultants will assist you in the development of a curriculum (DACUM) outlining specific job activities for any given occupation.

Connecting you with solutions.

We can link you with support in a variety of areas including employee turnover, hiring, applicant screening, funding for expansion, and more. Have a question? Don't hesitate to ask!

Assisting with maintenance of your training program.

We'll help you solve apprentice problems, understand regulatory requirements, and assist with ongoing support to keep your training program running smoothly.

Explore the ways health care apprenticeships can move your organization forward. Call today.
