LOSS OF EARNING POWER INFORMATION

Wages at the Date of Injury: The date of injury wage must be updated to reflect the wages the worker would have been earning had the injury not occurred. This is referred to as earning capacity.

Current Wages: Actual wages earned this payment period.

Time-Loss Rate and State's Average Wage x 1½ (see table below): Calculate for the calendar days in the payment period.

To be eligible for loss of earning power benefits, the injured worker:

- (1) Must be working at earnings less than at the time of injury.
- (2) Must have a loss of earning capacity in excess of 5%,
- (3) Must have medical certification that loss of earning is due solely to the industrial injury or condition.

1.5 TIMES THE STATE'S AVERAGE WAGE

Payment Period	Monthly Rate	Daily Rate	
7-1-25 through 6-30-26	\$11,895.00	\$396.50	
7-1-24 through 6-30-25	\$11,142.24	\$371.40	
7-1-23 through 6-30-24	\$10,520.86	\$350.69
