

CHAPTER 49.04 RCW APPRENTICESHIPS IN THE ELECTRICAL CONSTRUCTION TRADE

RCW 19.28.161 – RCW 19.28.191

Upon completion of the supervised work experience hours in an approved electrical construction apprenticeship, the apprentice is qualified for the appropriate electrician certification examination. Each electrical construction or maintenance trade apprenticeship program applies to only one specific electrician certification.

All apprentices learning the electrical construction trade must have a current [Electrical Training Certificate](#) issued by the Department of Labor and Industries. The apprenticeship training director may credit active apprentices with the mandatory hours of basic classroom electrical training necessary to renew a training certificate.

After June 30, 2023, unless working in a specialty, trainees must be registered apprentices or be enrolled in a two-year program in the electrical construction trade. Learn more www.lni.wa.gov/ElectricalApprenticeship

Apprenticeship programs may credit properly documented electrical experience on record with the department such as, 4000-hour electrical specialty certification, military experience or completion of a two-year training school program.

(01) General Journey Level - See the (01) Programs tab on our webpage www.lni.wa.gov/ElectricalApprenticeship
