

Are You Our New COHE Pilot Partner?

We need a health care leader, an existing COHE participating clinic, to pilot important innovations happening with COHE provider incentives. Help us engage with providers, workers, and employers to explain these new incentives and the benefits for COHE patients. By participating in this 18-month project, your organization will:

- Add a new financial incentive code to each first visit bill. This is paid with the first provider visit, for the first three providers, for the first year of the claim. Payment depends upon the provider's adoption of best practices:
 - Low Adopter: \$35
 - Medium Adopter: \$175
 - High Adopter: \$225
- Receive a quarterly report detailing current and historical data about COHE financial incentives for each provider.
- Temporarily suspend the Report of Accident financial incentive (currently \$20.54). This change doesn't impact a provider's ability to bill for FileFast incentives.

Most of the incentives we currently offer emerged when the COHE program first originated back in 2001. With your participation, we can gather provider and staff feedback to develop the best recommendations for provider incentives moving forward.
