

FREE VIRTUAL TRAINING EVENT FOR MANUAL LOGGERS

MEETS 4-HOUR FORMAL TRAINING REQUIREMENTS FOR LOGGER SAFETY INITIATIVE PARTICIPANTS*

Manual logging historically has had more frequent and severe injuries than other industries, especially among younger workers. The Logger Safety Initiative is a collaborative effort to promote worker safety, eliminate or reduce fatalities and severe injuries, and control workers' compensation costs.

This annual training event will focus on changes to the LSI training website, audit tool, and an update from the LSI Re-visioning team. Special guest speakers will lead in depth conversations and presentations about, self-supervision, risk management, safety, and other tools to keep loggers safe and working.

December 15, 2021 8 AM to 12 NOON

This year's annual training event is taking place virtually through Zoom. Sign up to receive a Zoom link via email to the training event.

Agenda

Welcome and Updates

Learn what is new in the LSI program. We will discuss changes to the LSI program, including updates to the LSI training website and an LSI Re-visioning update.

Chaser Accidents

DOSH and SHARP have prepared an informative narrated slide show.

Break
