(presentations are posted on the

<https://lni.wa.gov/safety-health/grants-committees-partnerships/advisory-committees/sh-committees-hazardous-drugs-advisory-committee>)

Discuss about USP 800

Annie, Erika and Seth has asked for help to work on the assessment tool. They have done a lot of work on this tool but would like input from others.

The group would like to create a subcommittee to develop a risk assessment tool to determine if a new drug should be treated as a hazardous drug.

If there are other topics you would like to hear more about for the next meeting please let Veda Moline at veda.moline@lni.wa.gov know.
