

The following table is provided in response to RCW 49.17.520. This legislation repeals the prohibition on regulating working practices related to musculoskeletal injuries and disorders and allows the Washington State Department of Labor & Industries to adopt one rule for either one industry or one risk class in a 12-month period. Washington State workers' compensation data for compensable work-related musculoskeletal disorder (WMSD) claims were analyzed to determine industry or risk class eligibility for ergonomic rule making. Information on how the data were analyzed for this table, and which industries and risk classes have been identified as high priority for rule making is detailed in the 2024 report, 'Industries and Risk Classes Eligible for Ergonomic Rulemaking'.

¹Only compensable claims were used for this analysis. Compensable claims have expenses beyond medical treatment, including payments for time loss, permanent partial disability awards, total permanent disability, and survivor benefits. Kept-on salary claims are considered compensable claims.

²FTE (full time equivalent): 1 FTE= 2,000 hours

³Trend analysis of a ten-year period (2013–2022) used to predict claim rate in 2025, and was compared to the predicted statewide claim rate in 2025 to calculate the rate ratio. Y=yes; N=no
